

## Pronađite tačnu veličinu rolera

Jednostavan metod: predlažemo da odaberete rolera normalne veličine cipela koje nosite.

Detaljan metod: dok jednostavan metod deluje za većinu, precizniju veličinu možete odrediti prateći uputstvo u nastavku i zatim odabrati odgovarajuću veličinu cipele koja uključuje izmerenu veličinu stopala.

Prijatno prianjanje je idealno za najbolju podršku zglobova i odgurivanje.

## Proveriti da li odgovara

Nožni prsti ne smeju biti pritisnuti na prednju stranu cipele ili skučeni. Prsti treba da lagano didiruju prednji deo cipele, jer će se pete pomeriti unazad kad budete u položaju za rolanje, kako bi napravili mesta za prste. Pete ne bi trebalo ni minimalno da se podižu.

## Izmerite noge

Koristite centimetre kao referencu da biste pronašli najbolju veličinu cipele. Kada merite stopala, stanite na tvrdnu podlogu i postavite pete do zida radi tačnijeg merenja. Izmerite obe noge i koristite duže mere (pogledajte ilustraciju).

## Vodič za veličinu po modelu

- Pronađite ispod tabelu koja se odnosi na model koji vas zanima
- Uzimajući u obzir meru vašeg stopala u centimetrima, potražite najprikladniju veličinu
